Professional Summary

Adaptable and detail-oriented Computer Science graduate with experience in functional testing, SQL data manipulation, and automation, and AI tool utilization. Currently working onsite at Metrobank as a Programmer Analyst in the Database Team, focusing on parameterization, database updates, system validation, and Level 1 (L1) support. Proficient in Java, Spring Boot, and database management. Passionate about optimizing workflows through automation and problem-solving.

Work Experience

Programmer Analyst

Metrobank | March 2023 – Present

Corebanking Project

System Parameterization & Data Updates: Expert in configuring system parameters and updating data to ensure optimal performance.

DML Scripting: Skilled in creating data manipulation scripts for efficient insert and update operations.

Query Optimization: Enhance query performance for faster and more efficient data retrieval.

System Updates Testing: Conduct thorough testing to ensure solutions meet business requirements and are accurately reflected.

Cross-Functional Communication: Collaborate seamlessly with frontend and backend teams to align on database-related changes.

Defect Support: Proactively identify, document, and verify resolutions for defect fixing, ensuring smooth operations.

Functional Testing & Quality Assurance: Conduct rigorous functional testing and ensure high-quality standards.

Process Automation: Innovate and streamline processes using batch files and VBA in Excel.

Contributed to 4 different releases/projects that handled data manipulation in database.

Onsite Support (Metrobank Branches)

Provide exceptional support to CSRs, tellers, and officers at Metro Manila branch locations, troubleshooting system errors and offering effective solutions.

Deliver clear, step-by-step guidance on system/application usage.

Resolve technical issues promptly, minimizing downtime and maintaining productivity

Version Control & Code Review: Utilize GitLab, Github for version control and code review to maintain code quality.

Develop and Maintain System

Nityo Infotech IT Services and IT Consulting | March 2023 – Present

Deployed at Metrobank as a Programmer Analyst.

Collaborating with teams to enhance software functionality and performance.

Technical Skills

Java, Springboot, PHP, Node JS, Javascript, React, Oracle
Database, MongoDB, SQL, Postman, Git, Banking

Backend Development, Frontend Development,
Functional Testing, AI Utilization

Education

2018 – 2022

Bachelor of Science in Computer Science

Bohol Island State University
